

I claim:

1. A toilet paper dispensing container having an opening which allows the release of a toilet roll, the container accommodates a plurality of rolls accessible, one at a time, via an opening portion in the front lower portion of the container wherein the container has an extendable strap and track mechanism which holds all of the rolls in place in the container above the roll that is to be released.
2. A toilet paper dispensing container as claimed in any preceding claim wherein the opening portion has on its lower surface a finger slot in which a user inserts his / her finger to pull a toilet roll out. A toilet roll dispensing container as claim in any preceding claim wherein when the opening on the front of the container is opened the strap extends to an extended position so that it sits below the following roll to be dispensed holding it and others above it in place and when the opening is closed the strap slides into the track mechanism and gravity allows the next roll to drop into position ready to be dispensed when required.
3. A toilet paper dispensing container as claimed in any preceding claim wherein a pivoted lid is provided at the upper end of the container to allow the filling of the container.
4. A toilet paper dispensing container as claimed in any preceding claim wherein the opening in the front of the container has a finger access slot into which a finger is inserted to allow the opening to be opened, the opening being hinged on one side.

5. A toilet paper dispensing container as claimed in any preceding claim wherein the container has a viewing aperture allowing a user to view how many rolls are contained in the container.
6. A toilet paper dispensing container as claimed in any preceding claim wherein mounting holes are provided on the rear of the container to allow the mounting of the unit on a suitable surface.
7. A toilet paper dispensing container as claimed in any preceding claim wherein reinforce mounting holes are provided on the rear of the container to allow secure mounting.
8. A toilet paper dispensing container as claimed in any preceding claim wherein the front of the container is in the form of a slideable, removable faceplate and also comprises the opening for releasing toilet rolls.
9. A toilet paper dispensing container as claimed in claim 9 wherein the removable face plate is provided with a viewing aperture allowing a user to view how many rolls are present in the container.
10. A toilet paper dispensing container as claimed in any preceding claim wherein toilet paper roll alignment bars are provided on the inside of the container to hold the toilet rolls therein in place.
11. A toilet paper dispensing container as claimed in any preceding claim wherein the container is angled so that the container can be mounted in corner crevice where two walls meet.
